5 Courses

Introduction to Front-End Development

HTML and CSS in depth

Programming in Python

Introduction to Databases for Back-End Development

Django Web Framework

Oct 3, 2025

Taught by Meta Staff

Carson Hitchens

has successfully completed the online, non-credit Specialization

Meta Web Development Fundamentals

Congratulations on completing the Meta Web Development Fundamentals Specialization! This certificate recognizes your hard work in learning essential web development skills. Please feel free to share it with your professional network. Throughout the program, you've watched instructional videos, completed assessments, and tackled hands-on exercises to build your web development skills from the ground up. You've built websites with HTML/CSS, adding interactivity with JavaScript, and writing clean Python code using object-oriented principles. You've also developed server applications with Django and learned effective collaboration using Git and GitHub for version control. With these foundational skills, you're well-equipped to continue your journey in web development!

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
