12 Courses

- Foundations of Coding Full-Stack
- Introduction to Programming With C#
- Introduction to Web Development
- Blazor for Front-End Development
- Back-End Development with .NET
- Database Integration and Management
- Full-Stack Integration
- Security and Authentication
- Performance Optimization and Scalability
- Data Structures and Algorithms
- Deployment and DevOps
- Full-Stack Developer Capstone Project

Oct 13, 2025

Marni Baker-Stein

Marni Baker-Stein,
Chief Content Officer

Carson Hitchens

has successfully completed the online, non-credit Professional Certificate

Microsoft Full-Stack Developer

Those who have earned this professional certificate have demonstrated their job readiness through hands-on experience and practical application in full-stack development. They have built expertise in both front-end and back-end technologies, including creating responsive user interfaces, managing relational and non-relational databases, implementing security protocols, and deploying web applications. Proficiency in modern frameworks like .NET, as well as in using tools like Microsoft Copilot for coding and debugging, showcases their ability to develop, optimize, and maintain robust, scalable full-stack applications.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
